

**Subject: About "One Million Signatures Demanding Changes to Discriminatory Laws and Stop Stoning Forever Campaign in Iran"**

**From: Members of the Swedish parliament and the other organization of the Liberal party ( Folkpartiet Liberalerna )**

As we all know Human Rights are the last matter of concern for the regime in Iran, particularly the living conditions for women in Iran are even worst. Having a very short overview of what is happening with the situation of women in Iran; one can notice this unreachable gap between men and women. The way women are being treated is nothing but cruelty and they are suffering from their very first and basic needs.

They are considered to be women from the age 9 and they can be sentenced to death for defending themselves from very shameful abuses as well as rape. There are countless grieving events like these, happening every day in Iran. Girls who sell their body just to stay alive and those who ran away from their families are increasing day after day.

**Their sound must be heard.** They need international support to able to stand on their feet again. Their weakening energy and power must be lightened again. People from all around the world can give them another hope for a better living and for a shining future.

Our encouragement and assistance will spark their desire and lightens their way to march through.

Let's give them the right hand and help them to rise again and to fight for their rights.

People all around the world can support them by their confirmation to the terrible situation of Iranian women.

Yours sincerely,

**Birgitta Ohlsson**, Member of the Swedish parliament, Chairman for International Affairs for the Liberal Party

**Gunnar Andrén**, Member of the Swedish parliament, from the Liberal Party
